

## FORAX-RM

### Rack Mount Modular System RF over Fibre

FORAX-RM (rack-mount) connects radios to distant antennas. FORAX-RM offers a high performance alternative to conventional radio:antenna coaxial cable connections, affording great flexibility in antenna location plus opto-isolation for all the user's radios. Antennas can be located up to 10 km from the radio or > 75 km by special order.

A FORAX-RM RF-over-fibre link consists of a radio interface module (RIM) and an Antenna Interface module (AIM). At the radio site, RIMs are mounted in a 19-inch rack mount chassis and connected by short coaxial cables to each radio's antenna port. At the antenna site, AIMS are mounted in a 19-inch rack mount chassis and connected to each antenna with coaxial cables. Each chassis is equipped with redundant hot-swappable AC power supplies.

#### Radio Interface Unit (RIU)

Up to 10 Radio Interface Modules (RIM) per chassis plus dual hot-swappable power supplies

#### Customer Antennas

Each antenna is connected via coaxial cable to its AIM

#### Available Waveforms

HF • SINCGARS • VHF • Maritime • UHF  
• UHF MILSATCOM ("TACSAT") including  
DAMA and HPW • EPLRS • SRF • WNW •  
ANW2 • GPS • Digital Data

#### Antenna Interface Unit (AIU)

Up to 4 Antenna Interface Modules (AIM) per chassis plus dual hot-swappable power supplies

#### Customer's Radios

Each radio's antenna port is connected via coaxial cable to its RIM

#### Customer's Optical Fibre Plant

- < 5 dBo optical loss
- < - 50 dBo optical reflectance
- Other specifications by special order

FORAX-RM functions as a long, loss-free link between the radio and the antenna. System limitations and installation difficulties associated with coaxial cable are overcome by the simplicity and performance of RF-over-fibre connections. FORAX-RM provides:

Feature	Benefit
<b>Long Connections</b>	Radio and its antenna can be located up to 10 km apart using single mode fibre
<b>EMP / EMI Immunity</b>	<ul style="list-style-type: none"><li>• Lightning, electromagnetic pulses, or RF interference cannot propagate over, or influence the signals on, optical fibre cables</li><li>• Radio equipment is opto-isolated from antenna</li></ul>
<b>Easy Routing</b>	<ul style="list-style-type: none"><li>• RF signals are carried on lightweight, flexible, rugged, optical cables</li><li>• Multiple radios can be carried on a single fiber optic cable</li></ul>
<b>All Frequencies, All Modulations</b>	<ul style="list-style-type: none"><li>• Geographic diversity in RF signal routing becomes easy</li><li>• FORAX-RM modules cover 30-512 MHz</li><li>• FORAX-RM modules handle all modulations including AM, FM, SINCGARS, HAVEQUICK, EPLRS, DAMA TACSAT, GPS (RX only)</li></ul>

RF Link Parameters	RF Performance	
Link Gain	+ 18 dB (with 30 m of fibre)	
Noise Figure (NF)	+ 9 dB	
1 dB Compression Point	- 20 dBm	
Third Order Intercept Point (IIP3)	- 10 dBm (with 30 m of fibre)	
Spur Free Dynamic Range (SFDR)	+ 103 dBm/Hz (with 30 m of fibre)	
<b>Common Frequency Bands for Factory-Installed Bandpass Filter or Diplexer</b>  Option: Auto-tuning or hopping filters available for some waveforms	<ul style="list-style-type: none"> <li>• HF 1-30 MHz</li> <li>• SINCGARS 30-88 MHz</li> <li>• Aircraft VHF 116-150 MHz</li> <li>• Maritime VHF and AIS 156-162 MHz</li> <li>• Military UHF 225-400 Hz</li> <li>• UHF TACSAT 243-318 MHz</li> </ul>	<ul style="list-style-type: none"> <li>• EPLRS/SADL 420-450 MHz</li> <li>• SRW (UHF)</li> <li>• WNW (UHF or L-Band)</li> <li>• ANW2 (UHF or L-Band)</li> <li>• GPS L1, L2 (receive only)</li> </ul>

Product Characteristics	Radio Interface Modules (RIM)	Antenna Interface Modules (AIM)
<b>Half-Duplex RX/TX Switching Time</b> Option: Full Duplex or Simplex Link	Supports DAMA TACSAT, EPLRS, SRW, WNW, ANW2	
<b>Optical Loss Budget</b>	< 5 dBo (Higher optical loss budgets available)	
<b>Radio TX Power into FORAX RIM</b>  Controllable in 3 dB decrements	<ul style="list-style-type: none"> <li>• 2 W (AM)</li> <li>• 5 W (FM)</li> <li>• 20 W survive</li> </ul> Other configurations available	-
<b>AIM TX Power into Antenna</b> Controllable in 3 dB decrements	-	<ul style="list-style-type: none"> <li>• HF modules: 100 mW</li> <li>• VHF, UHF: 10 W @ 50% duty cycle</li> <li>• TACSAT: 2 W or 20 W @ 50% duty cycle</li> </ul> Other TX power levels available
<b>User Interface</b>	Link Controls (details vary with waveform): <ul style="list-style-type: none"> <li>• TX power reduction, 3 dB steps</li> <li>• Filter band selection</li> </ul> Monitor LEDs: <ul style="list-style-type: none"> <li>• Laser operation (end-to-end)</li> <li>• TX RF operation</li> <li>• AIU TX amplifier over-temp</li> <li>• Command link fault</li> </ul>	Monitor LEDs: <ul style="list-style-type: none"> <li>• Power</li> </ul>
<b>Packaging</b> Option: Weather-tight enclosures with tactical fibre optic cables for field use in all environments	Up to 10 RIMs in chassis with two hot-swappable power supplies. RIMs are quarter-rack wide and 1U tall.	Up to 4 AIMs in chassis with two high-power hot-swappable power supplies. AIMs are half-rack wide and 1U or 2U tall.
<b>Installation Notes</b>	User's facility supplies AC power and fibre optic (FO) connection from RIU to AIU. Patch Cable Kits optionally available with coax cable for radio and FO patch cables.	
<b>Fibre Optic Connector Type</b>	SC/APC (other types available)	
<b>RF Connector Type</b>	N-type female (other types available) for radio links; BNC for GPS links	
<b>Power</b>	Universal AC	
<b>Operating Temperature</b>	- 10°C to + 60°C	- 10°C to + 60°C [Rack-mount] - 34°C to + 60°C [Optional weather-tight enclosure]
<b>Storage Temperature</b>	- 40°C to + 80°C
